

Column Addition

Problem of the Day AF 1.2

What property does the following equation show? What is the missing number?

$$(15 + 13) + 7 = 15 + (\text{ } + 7)$$

Algebra and Functions Review AF 1.2

If $4 + N > 10$, which of the following numbers could N be: 0, 1, 2, 3, 4, 5, 6, 7, 8, 9? Write the answer on your whiteboard.

Number of the Day NS 1.1

20

Throughout the day, find quantities that add up to 20.

Facts Practice NS 2.0

Multiply.

1. 6×1

2. 4×5

3. 7×2

4. 6×5

5. 5×3
