

# Hands On: Model Multiplication

## Problem of the Day KEY NS 2.1

One round-trip train fare is \$564. The student discount is \$75. What is the student price for a round trip ticket? Tell whether you used an estimate or found an exact answer.

## Mathematical Reasoning Review MR 2.4

A student ticket to the doll museum costs \$2.25. Can April buy 4 tickets with a \$10 bill? Explain how you got your answer.

## Word of the Day MR 2.3

**model**

Use a sheet of paper to make or draw a model of a math problem, an object, or a place of interest.

## Facts Practice KEY NS 2.1

**Subtract.**

1.  $28 - 22$

2.  $36 - 33$

3.  $45 - 36$

4.  $55 - 54$

5.  $105 - 103$

6.  $65 - 53$
