

WAMPANOAG

by

GENESIS

The Wampanoag live in Plymouth. The Wampanoag ate corn crops. For winter, they kill raccoons and make coats out of them. The Wampanoag have a feast dance to thank Kiehtan. They built homes with poles and bark.

The Wampanoag do feasts. They make clothes by hand. They build houses. The bark shelter was made almost entirely out of trees. They used spears to catch fish.
