

How Do I Nurture the Love of Reading?

♥ Read to Your Child Daily ... comprehension, vocabulary and fluency grow as well as the love of books. It's wonderful to reread that well-worn book your child loves to hear ... they can learn to track the words and children will try memorizing and rereading their favorite books.

♥ Subscribe to magazines devoted to your child's age level and interest to spark his/her reading ... try comic books, repetitive books, rhyming books, picture books with little text but great interest for your child. Children love reading books they previously heard.

♥ Let your child see you reading and make book-talk part of daily conversation.
