Grade _____

ID #: _____

Verification of student access to electronic instructional materials

School districts are required to provide students with sufficient instructional materials for all core subject areas -- mathematics, English language arts, science, and history-social science. Access to instructional materials must include access to materials that can be used in class and at home. This can be fulfilled by providing the materials to students in either a print and/or digital format. If students prefer to access the materials in a digital format at home, parents may opt their student out of receiving a print textbook. By checking the box below, you agree to access the digital materials in lieu of checking out a physical copy of the textbook.

<input type="checkbox"/> World History & Geography: Ancient Civilizations (grade 6)	<input type="checkbox"/> World History & Geography: Medieval & Early Modern Times (grade 7)	<input type="checkbox"/> United States History & Geography: Growth and Conflict (grade 8)

By signing below, I verify I am the parent/legal guardian of the student whose name appears on this document and confirm that technology to support electronic instructional materials is available for my student to access at home. I understand that by choosing the electronic version in lieu of the printed textbook, Murrieta Valley Unified School District has provided sufficient instructional materials as defined above. In addition, I understand my student has the option of returning to a printed format (text/workbook, etc.) at any time.
