

## Elevator Extra Credit Opportunity

You must fulfill all these requirements to get the max extra credit possible for this assignment:

- Pic(s) or video of you in the elevator on your bathroom scale to prove you really did this assignment
- Your weight reading while the elevator is not in motion
- On the way up, your lowest and highest weight readings (be sure to tell me when your lowest and highest weight readings occurred—i.e. when the elevator first took off or when it was approaching the top floor)
- On the way down, your lowest and highest weight readings (again, be sure to tell me when these weight readings occurred).

So to clarify, you should have 5 pieces of data/weight readings: your normal weight, 2 weight readings on the way up, 2 weight readings on the way down.
