

Hour of Code Night

Tuesday, December 19, 2017
5-6 p.m. in the Old MPR

Join us on December 19 to see how students of all ages (K-5) can enter the world of computer science by learning to code using the high-interest tools available on **code.org**. Coding helps nurture problem-solving skills, logic, and creativity, and as students will discover, it's fun! By starting early, students will have a foundation for success in any 21st-century career path.

We hope you'll join us for this fun, hands-on experience! Light refreshments will be provided.

For more information about how students can learn to code, visit **www.code.org**.
