## Modern Library Association (MLA) Reference

Do not bold, italicize, or underline title

Indent ½" or 5 spaces

 $\checkmark$  The format you will be using for all written assignments is called MLA (Modern Language Association). Your paper will have one inch margins, a header with your last name and page number on every page, a heading on the first page only, a title created by the writer, and consistent double-spacing using Times New Roman font in size 12. There is no cover page required; please do not include one.

In-text citations, also known as parenthetical citations, follow a specific format. When quoting directly from a written work, be sure to do so correctly. For example, "when using a quote from the text, you must write it word for word, exactly as it is seen, put quotation marks around it, and then cite the author's name and the page number where it is located in the text in parenthesis at the end" (Shakespeare 59). The end punctuation follows the last parenthesis mark. Try to embed quotes "so that your work is more fluid and less choppy" (64). Make sure that you include a works cited page, if needed.

## You should always cite the sources for quotations, facts that are not common knowledge, and ideas that are not your own.

The Works Cited appears at the end of your paper. You must include ALL sources used in your essay.

- 1. Title it Works Cited
- 2. Double space between each entry, not each line.
- 3. Each entry is in alphabetical order by author's last name (if there is no author, the title).
- 4. If the entry has more than one line, the second and third lines are indented five spaces.
- 5. There is a period at the end of each entry.
- 6. If you cannot fit the entire web address (URL) on one line, continue it on the next line after a slash only.

1/2" margin between top of page and header
