10. Draw a picture of your favorite sea animal or fish

11. Make a simple rainbow

Supplies:

Glass of water (in a glass-glass)

Piece of white paper

Sunlight

Fill a glass of water, about $\frac{3}{4}$ of the way full.

Take it to a sunny spot in your house next to a window.

Hold your glass up over the piece of paper and move it into the sunbeam.

You should see the rainbow on the paper!! You might need to move the glass around a bit, but you should get a nice rainbow.

This is a result of refracted light. The water bends the light waves, separating it into the different wavelengths that make up white light. The wavelengths are the colors you see!!

12. Simple Science: Magic Beans

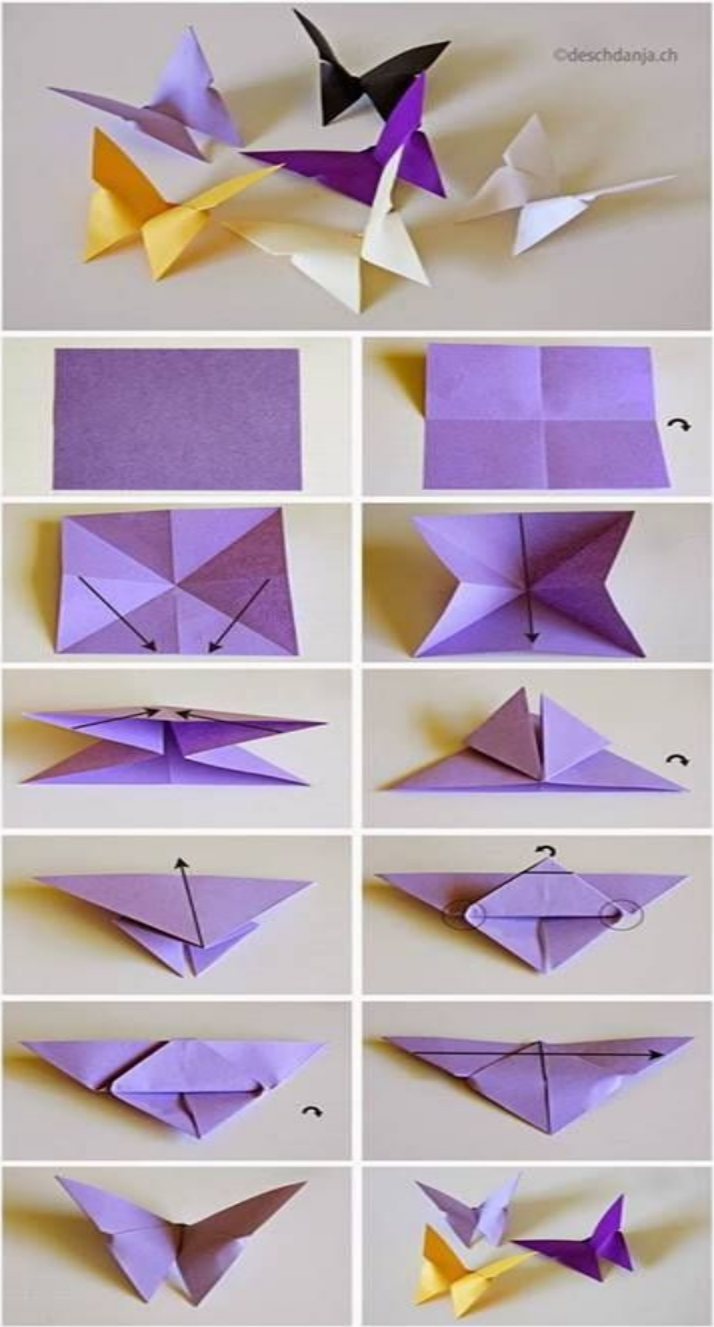

What you need:

- Wide mouth jar
- Water
- $\frac{1}{4}$ cup of white vinegar
- 3 tsps baking soda
- Food coloring
- Rice, buttons, or dried beans

What to do:

- Fill jar with water
- Add 3 - 4 drops of food coloring
- Add vinegar
- Add baking soda
- Drop in rice, buttons, or beans and watch them rise and fall.
