

**CONCEPTS AND ROLES**

The Governing Board believes that public education is of fundamental importance to a free society and to the continued development of democratic values, individual liberty and an appreciation for cultural diversity in society. In order for education to succeed, there must be an ongoing partnership between parents, students, educators, and the community.

The Board adopts the following three definitions for the development of sound and responsible educational policies:

Educational Philosophy: "Philosophy" means a composite statement of the relationship between the individual and society based upon beliefs, concepts, and attitudes from which the goals and objectives of the district are derived.

Educational Goal: "Goal" means a statement of broad direction or intent which is general and timeless and is not concerned with a particular achievement within a specified time period.

Objective: "Objective" means a specific accomplishment to be reached that can be verified within a given time and under specifiable conditions which, if attained, advances the system toward a corresponding goal.

Within this framework, the purpose of the district is to provide the guidance and resources necessary to ensure an environment conducive to learning. However, it is important to emphasize that the goal of our educational system is not to supplant parental responsibilities throughout the learning process. The Board desires to foster parental participation in order that an educational climate is created which reinforces the positive and healthy development of the child.

The Board's first goal must be to provide each student with the basic skills necessary to participate and function effectively in society. In addition, the Board is committed to the goal of achieving academic excellence through a program of instruction which offers each child an opportunity to develop to the maximum of his/her individual capabilities.
