

YEAR-ROUND EDUCATION

It shall be the policy of the Murrieta Valley Unified School District to assign students of the same family in the same Year-round Education (YRE) track/calendar unless one or more of such students is in a special education class or unless the parent or guardian of such students requests that the students be placed in different YRE tracks/calendars. It shall be the policy of the District to maintain the continuity of the teacher with the class.

Since the District's increasing student population continues to require a systematic expansion of Year-round Education classes, with a commensurate reduction and possible elimination of the traditional (September through June) schedule of classes, there can be no assurance that all students of one family will be scheduled for traditional classes within the same or other schools.
