

# BULL SHARK

by *Jared*

What kind of animal is it? Bull sharks are fish.

Where does it live? It lives close to shore.

How big does it get? Males are about 7' and 200 lbs. Females are 11 ½' and 500 lbs.

What does it eat? Fish and other things. What eats it? Nothing eats it.

How are babies born? Who takes care of them? Babies are born alive and no one takes care of them.

The most dangerous shark is the Bull Shark.

Girl sharks are bigger than boy sharks.

They can live in fresh and salt water.

Baby Bull Sharks are called pups. Bull Sharks have up to 13 pups at a time.
