

HAMMERHEAD SHARK

by 

Hammerhead Sharks live all around the world in warm waters along coast lines. They are tropical sharks.

Hammerhead Sharks are gray-brown with an off-white belly. They can grow from 3 feet up to 20 feet long. They weigh about 500 pounds, but can weigh up to 1,000 pounds.

They have a great sense of smell that helps find its prey. They eat stingrays and other sharks, squid, octopuses, lobsters and crab.

They give birth to babies like humans. As soon as they give birth, the babies are on their own. No one takes care of them.

1. Did you know that a Hammerhead Shark gives birth to 15 to 30 babies at a time?
2. Did you know they can get a sun tan?
3. Did you know the lifespan of a Hammerhead Shark is 20 to 30 years?
4. Did you know their babies are called pups?
5. Did you know they form schools that have as many as 500 sharks in them?
