

# The Wampanoag Tribe

a report by

## Jordan

### Weapons

The Wampanoag used their weapons more for hunting and fishing than for wars. The Wampanoag didn't fight that many wars. One of the wars was the King Phillip War. They were farmers.

### Food

They ate popcorn, fruits, and vegetables. They raised corn, squash, and beans. They ate that too. They were farmers and fishermen. They also hunted things. They hunted deer, wolf, bear, beaver, moose, wild turkey, raccoon, otter, and wildcat.

### Where they lived

The Wampanoags lived in New England in Plymouth. They were named people of the dawn. In the spring, they moved their villages to the seashore. They did that so they could fish and plant their food. In winter, they moved into the forests so they could hunt. They made holes in the ice so they could fish.
