Module 11

Duration: 55 minutes

Planning for Getting a Job

This module is designed to help high school students learn about and practice job-seeking skills such as identifying job openings, completing a job application, and writing a résumé.

Objectives

At the end of this module, students will be able to:

• State three good ways to identify job openings.
• Complete a job application in a neat, accurate, and legible form.
• Complete the worksheets for two different kinds of résumés and use Kuder® Navigator to construct those résumés online.
Module 11: Overview

Components

- **Mini-Lecture: Job Seeking Skills and Tools**
  15 minutes
- **Activity 19: Job Application**
  10 minutes
- **Preparing a Résumé in Kuder® Navigator**
  30 minutes

Facilitator Preparation

- Read the lesson plan and resource material.
- Arrange for use of a computer lab, ideally with one computer per student.
- Become thoroughly familiar with the Résumé Builder tool in Kuder Navigator.
- Arrange for a computer and display device to show the PowerPoint® presentation. This presentation can be accessed online from the Kuder® Administrative Database Management System.

Homework Assignment

Ask all students to look for job openings in at least one of the three occupations of their personal choice in the local newspaper as well as in Kuder Navigator, using the search available under the tab Find a Job.

For high school students planning to pursue any kind of postsecondary education, assign the use of the Find Schools section under the tab Plan for Education, utilizing the instruction sheet included as Handout 10: Using Kuder Navigator to Find Schools.

National Career Development Guidelines Addressed

- Indicator ED1.K7: Recognize that your educational achievement and performance can lead to many workplace options.
- Indicator CM4.A2: Demonstrate the following job-seeking skills: the ability to write a résumé and cover letter, complete a job application, interview for a job, and find and pursue employment leads.

ASCA National Standards for School Counseling Programs Addressed

- Indicator A:C1.3: Understand the relationship between learning and work.
- Indicator C:A2.6: Learn how to write a résumé.
Module 11: Lesson Plan

Introduction

Some of you will complete additional education after high school before getting a job. In fact, we encourage all of you to do that because of the decline in the 21st century of jobs that can be entered with a high school education only. All of you, however, will get a summer or part-time job in the near future and a full-time job later. This lesson will deal with some of the basics of how to find a job and complete the preparation you will need to do in advance to acquire it.

Mini-Lecture: Job-Seeking Skills and Tools

(15 minutes)

An early step in getting a job is to think seriously about what you want in a career. You will be spending slightly more than one-third of your waking time at work. Further, your satisfaction with the job, the people you meet there, and the income it provides will affect all of your other life roles. So, this is one of life’s big decisions, meriting the use of the Planful Decision-Making Model.

By now you have identified three occupations that seem most appealing to you. You have considered how they relate to your interests, skills, work values, and education plans. There is one more factor to consider as you approach the job market – characteristics that would cause you to select work with one employer over another, even though both allow you to work in the same occupation. Those characteristics are as follows:

- **Type of organization you want to work for.**
  Do you prefer to work for a for-profit company, nonprofit organization, or government agency?

- **Reputation of organization.**
  How important is it to work for an organization that has a reputation of making a fine product or providing outstanding service?

- **Salary.**
  What is the lowest salary you will accept? What is the level of salary you realistically desire?

- **Employer benefits.**
  Which employer benefits are desirable or essential for you?

- **Career ladder.**
  Must the position provide an opportunity for promotion or expanded responsibility of some kind?
• **Distance from home.**
  How far are you willing to commute?

• **Travel requirement.**
  Do you want a job that requires travel or want one in which travel is never necessary?

• **Making use of education or training.**
  How important is it that you use in this job the education or skills you have acquired?

A second step in approaching the job market is to find job openings in the occupation you wish to enter having the characteristics that you have selected from the above list (displayed on a PowerPoint® slide). Your first tendency might be to scan the classified ads in the newspaper, and there’s nothing wrong with that. However, fewer than 10 percent of people find jobs that way. The single best way to find job openings, called networking, is achieved through making contacts with as many people as you can identify, including:

• Your parents’ friends and acquaintances.
• Adults you know from faith-based activities, school, or other settings.
• Relatives.
• Adults for whom you have worked or performed volunteer service.
• Teachers and counselors.

Make a list of these people, and be sure to tell each of them that you are looking for a job with the characteristics you have defined. Ask them to tell you of any opportunities they know about or any other people you could contact. The broader you spread your network, the more likely you are to hear about job openings.

Once you know there is an opening in the occupation you want to enter and with the characteristics you desire, the next challenge is to get an interview. No one ever gets a job without an interview. There are two documents that may stand between you and the interview: a job application and/or a résumé. The appearance and content of these documents will either cause a prospective employer to want to see you in person or discourage the employer from doing so. Remember that both appearance and content are important.

**Appearance** includes neatness, having everything spelled correctly, being able to read the handwriting – in general, making yourself look like a competent person. Résumés are always word-processed while job applications are typically handwritten. **Content** includes completeness of information, accuracy of information, and the capability to relate your personal skills and training to the demands of the job.
There are two primary types of résumés. The first type is called a chronological résumé.

- It is one typed page.
- It lists education, work experience, and other experience you have in backward chronological order, starting with the most recent event.

This type of résumé is good for people who do not have any “gaps” in their lives (such as dropping out of college and traveling for two years or being unemployed for a long period of time) and have had a progression of jobs, each somehow better than the previous one.

A second type of résumé is called functional.

- It is one typed page.
- It is organized around skills that the person possesses and how these skills were acquired rather than a sequence of work experiences by dates.

This type of résumé is good for people who have acquired many of their skills through work at home or volunteer activities, those who have gaps in their work history, and for those – perhaps like yourself – who have not yet had any or much work experience.

**Complete a Sample Job Application**

(10 minutes)

Give each student a copy of Activity 19: Job Application. Ask students to complete the job application, remembering all of the following:

- Use a pen.
- Write very legibly or print.
- If uncertain about how something is spelled, look it up in the dictionary before writing it.
- Wherever possible, relate your own skills and experience to the requirements of the job.

After about eight minutes, or as soon as all students have completed the job application, stimulate discussion by use of the following questions:

- **What, if anything, did you find difficult about this activity?**
- **Whom did you use as references?**
  Tell students that they should not use relatives or good friends; rather, they should list previous employers, teachers, a counselor, or anyone else who has had an opportunity to observe their work. Also, they should ask for the permission of people whom they wish to list as references and come prepared with phone numbers.
- **Does your application present a picture of a competent person you would like to hire? If it doesn’t, why not?**
Preparing a Résumé in Kuder® Navigator

(30 minutes)

You will now be able to use Kuder Navigator to prepare a résumé, save it to your portfolio, and print it out in one of several formats.

There is no one right form for a résumé, though there are two common formats: chronological and functional. As the word “chronological” implies, this kind lists education, work experience, and other relevant experiences in backward chronological order. By contrast, a “functional” résumé focuses on skills that the person possesses without concern about chronological order.

In the next session, you will be able to develop a public e-Portfolio that includes your résumé and that you can post on the Web. If you wish, you can give the address of this site to a prospective employer or a school admissions officer. In order to develop your résumé, do the following:

- Sign on to Kuder Navigator as a returning user, entering the same user name and password you created when you signed on the first time.
- Select the tab Plan for Work.
- Choose the option to Write Résumés.
- Complete as many sections of the résumé as you can (title, objectives, work experience, education, activities/affiliations, awards/honors, skills, and references).
- Look at the Printable View of your résumé in each of the possible formats.
- Print out your résumé as a chronological résumé and as a functional résumé in any of the formats that you like.
- Save your résumé in your portfolio. You can edit if from there at any time.

Homework Assignment

Look for job openings in at least one of the three occupations of your personal choice in the local newspaper as well as in Kuder Navigator using the search available under the tab Find a Job.

Optional Activities

1. Invite a person from the Human Resource Development office of a local company to discuss job interviewing and/or résumés that attract positive attention.
2. For students planning any kind of postsecondary education, assign the use of the Find Schools section under the tab Plan for Education, using the instruction sheet included as Handout 10: Using Kuder Navigator to Find Schools.
Planning for Getting a Job

Of course, there is far too much information related to this topic to cover in one class period. The hope, however, is that what we are able to cover will raise awareness in the minds of students about the relationship between school, work, and future job placement.

The initial step in job seeking is to determine what one wants in a job. By this time, students studying this course have identified some possible occupations using values as one way to do that. Other criteria for consideration are desired job characteristics, such as the following:

- **Type of organization you want to work for.**
  Do you prefer to work for a for-profit company, nonprofit organization, or government agency?

- **Reputation of organization.**
  How important is it to work for an organization that has a reputation of making a fine product or providing outstanding service?

- **Salary.**
  What is the lowest salary you will accept? What is the level of salary you realistically desire?

- **Employer benefits.**
  What employer benefits are desirable or essential for you?

- **Career ladder.**
  Must the position provide an opportunity for promotion or expanded responsibility of some kind?

- **Distance from home.**
  How far are you willing to commute?

- **Travel requirement.**
  Do you want a job that requires travel or one in which travel is never necessary?

- **Making use of education or training.**
  How important is it that you use your education or skills in this job?
Once a person is able to describe the kind of job desired, the next step is to identify job openings. There are many ways to do that, including the following:

- Networking with friends and acquaintances (by direct contact or e-mail).
- Classified ads (in local printed newspapers or on web sites that display ads from hundreds of newspapers across the country).
- Placement agencies (the postsecondary school from which the student graduates, state job service offices without fees, or private placement agencies with a fee paid either by the applicant or the employer).
- Internet sites.

After identifying job openings, the next challenge is to get an interview. This is done by having an attractive and complete job application and/or résumé. For some jobs there are many applicants. Someone in the Human Resources Development office scans through a pile of job applications, or résumés, and selects those candidates who appear to be the best. For that reason, it is essential to have a neat, legible, attractive, and well-written application or résumé that will be outstanding enough that it gets placed into the “must interview” pile.

Organizations typically have their own job application form; however, the form will have a high similarity to the one included in this module. Since this is a standard form, there is little that an applicant can do to make it creative. The best chance of attracting attention with it lies with characteristics such as the following:

- It is neat and written or printed so it is legible, without erasures or words crossed out.
- All words are spelled correctly.
- All requested information is filled in.
- Wherever possible, the skills and training of the applicant have been applied to the requirements of the available job.

For a job that does not require postsecondary education, a résumé is seldom needed; thus, the job application is the only document by which the applicant can present a positive image.

A résumé is a short document that represents a candidate’s educational background, skills, work experience, and other life experiences related to job success. Résumés should not exceed two pages, and for most individuals one concise page is sufficient. This document will either attract employers to set up an interview with an applicant or discourage them from doing so. Without an interview, of course, there is no possibility of getting the job.
There is no one right format for a résumé. There are, however, two different general formats: chronological and functional. A **chronological résumé** is one that presents the applicant’s education, work experience, and other related experience in backward chronological order. This type of résumé offers the potential to highlight continuity of employment or education as well as vertical advancement or expansion of job duties.

A **functional résumé**, on the other hand, is arranged according to categories of skills (such as organizational, computer, and communication skills) and lists employment, training, or other experiences that have developed and exercised these skills. Thus, a functional résumé may be better for those who have an interrupted work history, acquired many of their skills through volunteer or homemaking responsibilities, or are recent graduates with limited or no work experience.

There are also several styles to choose from in order to present an appropriate résumé. The basic résumé style has the least amount of formatting. It is suitable for copying into another program for additional editing as well as for use as an electronic résumé that can be submitted in print form or on a disk that can be scanned into a searchable database or included in or attached to an e-mail. The **contemporary, elegant, and professional** styles are all suitable for printing. Simply choose the style you prefer.

In this class session, students will use *Kuder Navigator* to enter the standard data and then format the data either as a chronological or functional résumé in different styles. This résumé, and multiple others, can be stored in the student’s electronic portfolio and edited at any time. These résumés may be marked as public or private. Public résumés can be sent electronically to anyone the student chooses. Private résumés can only be viewed by the student.

The next step in a successful job search is a job interview. Time does not allow coverage of this topic in any detail in this lesson. If your lecture time allows any coverage at all, these points may be helpful. They are covered in greater detail in *Kuder Navigator* under the tab **Plan for Work**.

- Always find out ahead of time exactly where the job interview is. Do a “dry run” by going to the exact place in order to estimate the time it will take to drive or go by public transportation. If you are going to drive to the interview, a dry run will also allow you to scout out in advance where to park.
- Learn as much as possible about the company or organization in advance of the interview by looking at its web site, talking to others who work there, or acquiring public relations brochures from the Public Relations or Human Resources Development office. This will allow you to present an image of being informed about the organization and will make it possible for you to relate your own skills and experience to the needs of the organization.
• Dress conservatively and appropriately. A good rule of thumb is to dress in the manner that an employee in the position for which you are an applicant would dress on his or her most “dressed up” day on the job. Women should be conservative about dress style, jewelry, make up, and use of perfume. Men should be conservative about length of hair and use of body jewelry.

• Arrive five to 10 minutes early for the interview – but not earlier, and never late.

• While you are in the waiting room, do not smoke, put your feet on the furniture, slouch, or attempt to make friends with employees working in that area. Job applicants are often observed from the moment they enter.

• When you do meet the interviewer, greet him or her with a warm handshake and good eye contact. Be as calm as it is possible for you to be. Let the interviewer take the lead. Above all, remember to relate your own skills and education to the requirements of the job.

• Before having an interview that is really important to you, schedule two or three for jobs that are not important to you in order to get some practice and build your self-confidence.

Though this is a brief overview of the job-seeking process, it provides some general principles that can be reinforced by teachers of other subject matter. Speech teachers might set up mock job interviews, videotape them, and critique them. Teachers of any subjects might invite staff from the Human Resource Development Department of local employers to talk with students about jobs related to their subject matter field, including what kinds of résumés, work and school experience, and interviewing skills enhance the students’ possibilities of getting a job.
Activity 19: Job Application

Fill out the sample job application below.

Handout 10: Using Kuder® Navigator to Find Schools

*Kuder Navigator* includes a database of approximately 7,000 postsecondary schools that is maintained by the National Center for Educational Statistics. The database includes all schools that are approved for receiving federal funds for financial aid. The information for a postsecondary school in the database is provided by the school itself, and it is updated on an annual basis.

You may search this database by all of the characteristics detailed in this handout. You may want to complete this worksheet before starting your online search. However, you may not be able to use all of the characteristics because your search may produce no schools at some point in the sequence. For that reason, you will want to start with the characteristics that are most important to you. As you add each characteristic, you will be able to see the number of schools remaining with all of your previous choices. If you do reach zero, you can remove a characteristic previously chosen.

In order to use the school search, sign on to *Kuder Navigator at www.kudernavigator.com* with your user name and password. Then, to access the school search:

- Choose the tab Plan for Education.
- Choose the option Find Schools.

**Geographic Region** (select one)

- **New England** (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont)
- **Mid-East** (Delaware, Washington D.C., Maryland, New Jersey, New York, Pennsylvania)
- **Great Lakes** (Illinois, Indiana, Michigan, Ohio, Wisconsin)
- **Plains** (Iowa, Kansas, Minnesota, Missouri, Nebraska, South Dakota, North Dakota)
- **Southeast** (Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, West Virginia)
- **Southwest** (Arizona, New Mexico, Oklahoma, Texas)
- **Rocky Mountains** (Colorado, Idaho, Montana, Utah, Wyoming)
- **Far West** (Alaska, California, Hawaii, Nevada, Oregon, Washington)
- **Outlying Areas** (American Samoa, Federated States of Micronesia, Guam, Marshall Islands, Northern Mariana Islands, Puerto Rico, Palau, Virgin Islands)
- **U.S. Service Schools**

**State of Preference:** ____________________________

**City or ZIP Code:** ____________________________

Distance from home or other location

**Miles:** ____________________________
