- Scope and Sequence
- Response to Intervention
- Meet the Authors

Home Tab

Access EasyCBM through all five tabs or through the links on the page.

Students Tab – Enter new students or edit your current list, grouping them by grade, class, period or subject

Add new Groups or Students by clicking the Add Group or Add Student buttons. If a student is in the currently selected group, they will have a check next to their name. If the student is not in the group, their checkbox will be unchecked. When a grouping or student is selected, links will appear that allow you to edit the entry. Alternatively, you can add new students.

Measures Tab – Download and print measures, then enter scores online.

Select the grade level of the measure you want to access, then scroll to its section. For measures that can be administered online, have your students and follow the on-screen instructions. Mark the checkbox next to each measure you want listed for your students to take online.

Reports Tab – View and analyze your students' test, progress and scoring.

To view a **Group** report, click on the name of the group, and all of their active CBMs will appear below. Select a CBM name to see a summary and list of student scores. Then click "View" to see any student's actual submission. (Scroll down)

Select the **Individuals** subsection for easy one-click access to system wide data by student. Intervention lines for graphs can be set up in the Interventions subsection. (Scroll down)

Reports can be exported to an excel spreadsheet under data export

Progress Monitoring Scoring Guidelines – pdf file – Interpreting the EasyCBM Progress Monitoring Test Results (Grade by grade)

Account Tab – Change your password or edit any information associated with your account.

This is the place to edit any information that is associated with your account, such as your username or email address. You must enter your current password for any changes to take effect. You can also export or import any of your students' data in the system.

Training – Learn how to administer and score the measures used by EasyCBM.

This multimedia module provides training on the EasyCBM assessment system and proficiency exams for you to check your understanding. Complete the training section first before proceeding to the proficiency exams. Click on the links below to get started.
