

Late last week Murrieta Valley's Team 569C was knocked out of the top 30 in programming skills and therefore was not going to be able to attend the World Championships. The students, feeling disappointed looked for a solution and found a last chance tournament in Hesperia this past Saturday, 3/3/12. Four students set out on their own (as I could not attend) to give it one last shot.

Not only did they crack the top 30 but Team 569C holds the 4<sup>th</sup> highest score in the WORLD! Talk about determination and heart from this team. If you have Devin Bailey, Devin Catron, Dylan DaPra, and/or Bryce Longacre please extend a big congratulations to them.

The Skills Rankings for the VRC World Championship include results from official events held through March 4, 2012. Skills Challenge results from events held after March 4 will not be included.

Click to see the [Robot Skills Rankings](#).

**Programming Skills** green highlighted = Currently qualifies for World Championship (if the season ended today)

Rank	Score	Team	Team Name	Team Organization	Team Location	Event	Date
1	35	599D	Robodox	Granada Hills Charter High School	California, United States	<a href="#">Golden State VEX Robotics Championship</a>	2/25/12
