	CTE Fire Science & Technology III				X
	Fire Science EMT *	X			X

CTE (Career Technical Education) courses provide early experiences for every student to gain exposure to, and explore, a full array of post-secondary, college, and career choices. Several courses are articulated* with community colleges. The majority of the courses in each pathway have been approved to meet University of California a-g eligibility for admissions.

***Articulated = college credit, **MSJC Annex College Course (weighted)**

CTE courses are sequenced according to knowledge and skills. Students need to complete the courses in sequence in order to progress from introductory to capstone curriculum.

Introductory = entry level course that contains concepts and skills to build foundational and general knowledge.

Concentrator = beyond the entry level, intended to provide more in-depth instruction and career exploration.

Capstone = final course in a planned pathway that provides rigorous and intensive culmination of study. (VPA credit)
