

# Brown Bag Earth Science Humor Project

## 25 points

Due \_\_\_\_\_

Just like you used to bring your lunch to school in a dirty old brown bag (or a Justin Bieber or Star Wars lunch pail) when you were young, now we will use that same bag to showcase your love of Earth Science and your sense of humor. WOW!!!

Remember, this project is about **YOUR** love of something Earth Science related so make sure that is the focal point of it. I want to know something you love about the earth, anything at all, and show yourself in the project. In other words, what about our planet do you enjoy, like, or is related to something you like? Ex: I fish, hike, camp, and am an outdoorsman, so I would create a project that dealt with those ideas and put myself in it somewhere and make it hilarious!

### Requirements:

- brown bag: you may use it in any way you like, as long as it started as a normal brown bag. Be creative, funny, weird, interesting, odd, I don't care as long as it's all yours and humorous. You can fold it, chop it, chew it up, etc, etc. (if you chew it, go ahead and keep it)

- Remember, this is an Earth Science Humor project so it needs to be either funny or interesting, it does not matter which (I prefer funny), but if it doesn't meet one of those you won't get credit, and I'm serious here, 0 (zero, nada, zip, goose egg, nil, zilch...) credit!!

- Earth Science: you must relate it to Earth Science, ie. Something on the Earth that can be studied, which is basically anything that involves the planet or outer space, so you have a lot to pick from

- include some information about the event and how you enjoy it

- include pictures or drawings

- add anything else you want that will make the bag more interesting/funny

- take pride in the planet as it's the only one you've got, at least for now

- know where you live and learn how you can better take care of it and enjoy what it has to offer. Life is meant to be enjoyed, take a risk and have fun!!!!
