

Energy Production in the U.S. by Source per Need in %

Source Transportation Electricity (Heating, Cooling, Cooking)

	1993	Current	2040	1993	Current	2050 (Projected)
Coal				53	27.4	17
Nat. Gas	1	3	5	13	35.1	39
Nuclear				19	19.3	12
Hydro				8	7	3.24
Wind			?	2	6.6	4.5
Biomass		3	5	.4	1.5	.09
Solar			?	.2	1.6	8.6
Geothermal				.4	.4	.72
Petroleum	99	90	85	4	.6	1

Problems you see with any of these numbers and why are they problems also compare with your Presentations:
