

## **The Story of Earth Write-Up**

In this assignment you will use your experience with the History of the Earth Internet Lab, Understanding Geologic Time Internet Activity, video notes from the History of Earth video, and the Stories from the Fossil Record Evidence charts to write the chronological story of the Earth.

### **Write-up order:**

- Start with the formation of the Earth and explain the events and changes to Earth that have taken place over time.
- You need to include as much detail as possible about the events, not just list them.
- Make sure you specify when these events (how long ago) took place and how they affected the Earth, life on earth, and the future of earth.
- Make sure to include information about the multiple mass extinctions.
- Make sure to mention the fossil and rock evidence that led scientists to their conclusions on the history of earth and when all the major events happened.
- Do not leave out information about where the coal and oil used for most of the world's energy came from.
- Your writing should be 4-5 paragraphs in length with proper grammar and spelling. If you need help with a word or spelling see me.

This assignment is worth 100 points so be as detailed as you can.
