

Class Syllabus / Program Description
Vista Murrieta High School
Mr. Mosiello
SDC Computer/ Careers and Health

Welcome I am currently teaching Computer/ Career. The students will be presented the basic information included in the state-mandated curriculum for the subject area, adapted to the academic level that is appropriate for the student as per their I.E.P (Individual Education Plan). All SDC (Special Day Class) programs are I.E.P. driven.

The emphasis in these core curricular classes is on the reading and comprehension of the material, as well as written communication and social interaction. The material will be presented using multiple modalities, with much repetition and reinforcement to enable the students to grasp the material at their own academic level. Furthermore we will do experiments in the classroom. Please be advised that students will be using lab equipment and are responsible for broken or damaged equipment.

The students will have daily seat work, quizzes, tests, projects, presentations, and will be required to take notes. The materials presented will address the student's individual goals in a class room format.

Homework will be assigned, and the students are accountable for completing this work. I try to make the homework assignments of a level that the students can complete independently, however they may sometimes need some clarification from parents when they do not understand the format. The work itself should be work that they can complete independently.

I will contact you if your student is not performing adequately over a period of time. Everyone is allowed to have a bad day or so, but if changes occur of if we have a long stretch of less than best effort, I will contact you so we can discuss options. Please feel free to call me, write me or email me anytime and I will get right back to you.

Call: (951) 894-5750 x) 6627
Write: Send a note with your student
Email: mmosiello@murrieta.k12.ca.us

In order to ensure success for your student, it is important that lines of communication are open. **Thank you very much for all of your support.**
