

## **Be The Conductor!**

### **Learning Moments From Flipgrid Video:**

The purpose of the Conductor

The use of the Conducting Baton

Use of the “non” baton hand to help with *“Fast, Slow, High, Low” this is how our music goes.*

### **Fun Projects:**

With your “Right Hand” (Traditional) try conducting some of your own songs, drumbeats, in different speeds.

With your “Left Hand” (Traditional) try matching loud, down for soft, and even across for smooth!

Make up your own movements for the sounds you hear from movies, video games, etc.

How does the music match the movements in these movies and video games?

Does the conductor do anything different?
