

Welcome to the MVUSD Recorder Program!

Through a combination of live instruction, and providing free access to Flipgrid, students can work ahead, or take their time to reflect and dream! This is possible by clear objectives, flexible, unified themes, organized assignments, relevant material, and teacher video.

Successful teaching / mentoring provides obvious support, guards against fear, uses introductions, facilitates interactivity, models positive culture, expects professional behavior, and overcomes challenges!

All lessons are coordinated learning units. It is important to not rush objectives, provide self-reflection, balance class contributions, be clear, and don't overload for the best results.

In this age of technology use, assist learners, provide feedback, provide time to learn, promote peer-learning, give clear direction.

Flipgrid learning is project-based and self-contained. Students enter from their teacher's Canvas page, or as directed. Live video lessons supplement structured Flipgrid lesson plans.

Teacher: Dr. Thomas Garvin
