

Welcome to the MVUSD Music Connections Program!

Through a combination of live instruction, and providing free access to Flipgrid, students can explore, or take their time to reflect and dream! This is possible by inclusive objectives, flexible, unified themes, organized content, relevant material, and positive teacher videos.

Successful teaching / mentoring provides obvious support, guards against fear, uses introductions, facilitates interactivity, models positive culture, expects professional behavior, and overcomes challenges!

All lessons are coordinated learning units. It is important to not rush objectives, provide self-reflection, balance class contributions, be clear, and don't overload for the best results.

The activities are evergrowing! They are organized as Sing-A-Long, Drum and Dance, and Storytime. Each is standards-based and fun!

Flipgrid learning is project-based and self-contained. Students enter from their teacher's Canvas page, or as directed. Live video lessons supplement structured Flipgrid lesson plans.

Teacher: Dr. Thomas Garvin
